

Experiment-3

1. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

AIM:

To develop a simple Car Booking Reservation System using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application enables users to book cars by selecting travel details such as pickup location, destination, rental type, package, and duration.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named Car Booking Reservation System.

Design a form with the following fields:

- Customer Name
- Mobile Number • Email ID
- Search for Cabs
- From (Pickup Location)
- To (Destination)
- Trip Type (Rental / Outstation)
- Package Type
- Hours/Days
- Car Type
- Pickup Date & Time
- Fare
- Booking Date
- Booking Status

Configure drop-down lists for Trip Type, Package Type, and Car Type.

Create workflows to:

- Automatically set the Booking Date to the current date and time.
- Automatically set the Booking Status to Booked.

Save and publish the application.

Enter sample booking details and submit the form.

Verify that the booking information is stored correctly and the workflows execute successfully.

INPUT:

car

customer name	Hari prakash.N
mobile number	+91 9940729595
Email	hariprakash91414@gmail.com
from	madurai
to	chennai
booking time	out station
package type	80km,12hrs
car type	sedan
number of days	2
number of hrs	24
pickup date	1-Aug-2026
pickup time	HH:mm:ss

OUTPUT:

car Report

customer name	mobile number	Email	from	to	booking time	package type
Hari prakash.N	9940729595	hariprakash91414@gmail.com	coimbatore	chennai	out station	40km,8hrs
Kiran	6382885668	kiran44@gmail.com	chennai	madurai	rental	40km,8hrs

DESIGN:

The screenshot shows the 'car' form design in Zoho Creator. The form is titled 'car' and is located in the 'car' app. It contains the following fields:

- customer name: Text input field
- mobile number: Text input field with a dropdown for country code (+91) and a value (81234 56789)
- Email: Text input field
- from: Dropdown menu with '-Select-'
- to: Dropdown menu with '-Select-'
- booking time: Dropdown menu with '-Select-'
- package type: Dropdown menu with '-Select-'
- car type: Dropdown menu with '-Select-'
- number of days: Text input field with a placeholder '#####'
- number of hrs: Text input field with a placeholder '#####'
- pickup date: Text input field with a placeholder 'dd-MMM-yyyy'
- pickup time: Text input field with a placeholder 'HH:mm:ss'

WORKFLOW:

The screenshot shows the workflow builder for the 'car' app. The workflow is titled 'Deluge Script' and is located in the 'car' app. It contains a script that sets the booking date to the current time and the booking status to 'Pending'.

```
1 input.booking_date = zoho.currenttime;  
2 input.booking_status = "Pending";  
3
```

The workflow builder interface includes a sidebar with various actions and functions, and a main area for editing the script. The script is currently empty, and the user can add actions or functions to the workflow.

RESULT:

A cloud-based Car Booking Reservation System was successfully developed using Zoho Creator. The application allows users to search for cabs, choose rental or outstation trips, select packages, and reserve cars. The system automatically records the booking date and booking status, demonstrating the Software as a Service (SaaS) model using a cloud platform.
